**Professional Recommendation for Wayne M. Richards**

To whom it may concern:

I have enjoyed a professional relationship with Wayne M. Richards for the past 17 years. During that time I have been in a position to review and inspect his work as it relates to the design and installation of fire alarm systems, on many occasions.

Mr. Richards and I have successfully collaborated on the design and installation of many large commercial fire alarm projects, including 3 hospital campuses and most recently, a campus-wide fire alarm network at the Department of Energy Nuclear test facility in Las Vegas, Nevada. Mr. Richards provided the device layout for this system, and performed the installation under the engineering oversight of our Denver, Colorado office.

**I can confidently recommend Mr. Richards as being knowledgeable and competent in all aspects of fire alarm design, installation, and service.**

Please do not hesitate to contact me directly for additional information in this regard.

Sincerely

Dave Boswell S.E.T.  
Regional Director - Business Development
